

Flags - Instructions

Materials List

1. Ground Steak
2. Bolt
3. Metal Cross Bars (If flag cross bar option chosen)
4. Ground Stake (If Stake option chosen)
5. Flag Poles
6. Carrying case
7. Flag
8. PVC Water Weight (optional)

*You will need a hammer if installing the ground stake.

Flag Assembly:

1. Step 1: Arrange all the poles in order from smallest to largest
2. Connect all the poles in order from smallest to largest. (If the poles do not fit try rearranging them)
3. Starting with the smallest end, slide the pole completely inside the reinforced pocket.
4. (If using ground stake) Hammer the top of the main part of the steel rod into the desired location on the ground for the flag.
5. (If using cross base) screw the bolt through the middle of the cross base pieces into the bottom of the flag base.
6. *Optional if using water weight fill the pvc pouch with water and slide the water weight over the flag base.
7. Place the flagpole on the flag base.
8. Using the bungee string, tie the flag to the base.

*Do not install within 5ft of trees, wires, or poles.

* Take your flag down during storms or high winds.
